

Wallingford Station Factsheet

On November 6, 2017 the new **CTrail** Hartford Line Wallingford Station officially opened to the public. Construction of the station began in December 2014 and cost approximately \$21 million.

Station Location and Parking:

The new Wallingford Station is located at 343 North Cherry Street, at the intersection of North Cherry Street and Parker Place, with alternative access from North Colony Road. The station includes two surface parking lots totaling 221 spaces.

Parking Pricing and Ticket Fares:

- Hartford Line fares and schedules are available at hartfordline.com
- Two surface parking lots totaling 221 spaces are available to Hartford Line customers and the public.
- Parking at the station is \$2 day or \$20 per month.
- Parking is free on weekends and federal holidays.

Station Amenities:

- High-level platforms to facilitate safe and efficient passenger boarding.
- Stairways and two elevators connecting to an overhead pedestrian bridge for safe and convenient access between the platforms.
- Overhead canopies covering approximately 50% of the platform length to shelter passengers from direct sunlight and precipitation.
- Automatic snow melting system to quickly melt snow and ice during inclement weather for passenger safety on the platforms.
- Passenger information display system providing real time rail service updates.
- Security cameras and Blue Light emergency call boxes for passenger safety.
- Ticket vending machines, providing quick and easy ticket sales.
- One electric vehicle charging station, allowing two cars to charge at once.
- Bicycle racks with capacity for up to eight bicycles to accommodate multimodal connections.

Hartford Line Service:

Launched on June 16, 2018, the new **CTrail** Hartford Line passenger rail service increases the number of trips servicing the new Wallingford Station. The service consists of a combination of Amtrak and Hartford Line trains. It features 17 daily round trips between New Haven and Hartford, with 12 of these trips continuing north, terminating at Union Station in Springfield, MA. Trains operate at speeds up to 110 MPH, with a travel time between New Haven and Springfield of approximately 81 minutes. The Hartford Line provides direct or connecting service to New York City, Boston, and Vermont.
